

## INDEPENDENT AUDITOR'S REPORT

To the Board of Directors

**Konnect Style Retail Private Limited**

**Report on the Audit of the Interim Financial Statements**

### Opinion

We have audited the accompanying special purpose interim financial statements of **Konnect Style Retail Private Limited ('the Company')**, which comprise the Statement of Assets and Liabilities, as at December 31, 2023, the Statement of Profit and Loss, (including the Statement of Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the period May 13, 2023 to December 31, 2023, and notes to the interim financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the special purpose interim financial statements") prepared by the company to the extent required by **Bazaar Style Retail Limited ('the Holding Company')** to prepare consolidated financial statements for the period ended December 31, 2023.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid special purpose interim financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards 34 "Interim Financial Reporting" ("Ind AS 34") prescribed under section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018 ("the Regulation") as amended, as amended, and other accounting principles generally accepted in India, of the state of affairs of the Company as at December 31, 2023, its profit including other comprehensive income, its cash flows and the changes in equity for the period May 13, 2023 to December 31, 2023.

### Basis for Opinion

We conducted our audit of the interim financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Interim Financial Statements' section of our report. We are independent of the Company in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants (ICAI) of India together with the ethical requirements that are relevant to our audit of the interim financial statements under the provisions of the Act and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the interim financial statements.

### Management's Responsibility for the Interim Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these interim financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended and SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018 ("the Regulation") as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the

provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the interim financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

### **Auditor's Responsibilities for the Audit of the interim Financial Statements**

Our objectives are to obtain reasonable assurance about whether the special purpose interim financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not purposes of expressing an opinion on the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the interim financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the interim financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the interim financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the interim financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the interim financial

statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

#### **Other Matter**

The comparative figures for the corresponding previous period as required under Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), have not been compiled by the Company in the accompanying special purpose interim financial statements, since this is the first reporting period of the Company as Company was incorporated on 13<sup>th</sup> May 2023.

We draw attention to note 29 to the accompanying special purpose interim financial statements; The Company has incurred a loss of Rs. 2.61 lakhs during the current reporting period. The current liabilities exceed its current assets as at December 31, 2023. These conditions indicate that a material uncertainty exists that may cast doubt about the Company's ability to continue as a going concern. Considering the matters set out in the said note, this financial statement is prepared on a going concern basis.

Our report is not modified in respect of the above matters.

#### **Restriction on Use and Distribution**

We have performed the audit at the request of the Directors of the Company, solely to enable, Bazaar Style Retail Limited to prepare consolidated financial statements for the period ended December 31, 2023, as per the requirements of Indian Accounting Standards 34 "Interim Financial Reporting" ("Ind AS 34") prescribed under section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018 ("the Regulation") as amended, and other accounting principles generally accepted in India.

Accordingly, this report is not for the use or benefit of any other party, nor is it to be copied, made available to or otherwise disclosed to any other person to whom this report is shown, or into whose hands it may come save where expressly agreed by our prior consent in writing.

Notes forming part of the financial statements as at and for the period ended December 31, 2023

**Depreciation methods, estimated useful lives and residual value**

Depreciation on property, plant and equipment is calculated on a straight line basis using the rates arrived at, based on the useful lives estimated by the management. The Company has used the following rates to provide depreciation on its tangible fixed assets:

Assets Category	Life estimated by the management based on technical assessment (years)	Useful life as per Schedule II (years)
Furniture & Fixtures	10	10
Office Equipment	5	5
Motor Vehicles	8	8
Computer & Accessories	3	3
Air-conditioner	5	5
CCTV Camera	3	3
Servers & Networks	6	6
Office Building	60	60
Plant & Machinery	15	15
Electrical Installations and Equipment	10	10

**k) Intangible assets**

Intangible assets are stated at cost less accumulated amortisation and impairment. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in the Statement of Profit and Loss, in the period in which the expenditure is incurred.

Intangible assets with finite life are amortised over the useful economic life and assessed for impairment, whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period and changes if any, made on prospective basis. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Profit and Loss.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is de-recognised.

**Amortisation methods and periods**

A summary of amortisation policies applied to the Company's intangible assets is as below:

**Intangible assets Useful life Amortisation method used**

Assets Category	Useful life estimated by the management based on technical assessment (years)
Computer Software	3

**l) Impairment of non-financial assets**

At the end of each reporting period, The Company reviews the carrying amounts of its assets to determine whether there is any indication of impairment based on internal/ external factors. An impairment loss, if any, is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. An asset's recoverable amount is higher of an asset's or cash-generating unit's (CGUs) fair value less costs of disposal and its value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rates, that reflects current market assessment of the time value of money and the risks specific to the asset for which estimates of future cash flows have not been adjusted. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually as at reporting date. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in the Statement of Profit and Loss.

Reversal of impairment losses except on goodwill is recorded when there is an indication that the impairment losses recognised for the assets no longer exist or have decreased. An impairment loss recognised for goodwill is not reversed in subsequent periods.

**m) Inventories**

**Traded goods:** At lower of cost and net realisable value. Cost of inventories comprises all costs of purchase price and other incidental costs incurred in bringing the inventories to their present location and condition. Cost is determined based on weightage average method. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and to make the sale.

**n) Earnings per share**

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

*[Handwritten signature]*

Notes forming part of the financial statements as at and for the period ended December 31, 2023

**o) Cash and cash equivalents**

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand, cheques on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

**p) Investments**

Investments that are readily realisable and intended to be held for not more than a year are classified as current investments. All other investments are classified as non-current investments. All investments are carried at fair value.

**q) Dividend**

Dividend declared is recognised as a liability only after it is approved by the shareholders in the general meeting. The Company recognises a liability to make cash or non-cash distributions to equity holders of the parent when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity. Dividend is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

**r) Provisions and Contingent liabilities**

Provision are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligations, the provision is reversed.

**Contingent liabilities:** A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognise a contingent liability but discloses its existence in the financial statements. Contingent assets are only disclosed when it is probable that the economic benefits will flow to the entity.

**s) Significant accounting judgements, estimates and assumptions**

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In particular, the Company has identified the following areas where significant judgements, estimates and assumptions are required. Further information on each of these areas and how they impact the various accounting policies are described below and also in the relevant notes to the financial statements. Changes in estimates are accounted for prospectively.

**t. Judgements**

**(i) Contingencies**

Contingent liabilities may arise from the ordinary course of business in relation to claims against the Company, including legal, contractor, land access and other claims. By their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence, and potential quantum, of contingencies inherently involves the exercise of significant judgments and the use of estimates regarding the outcome of future events.

**(ii) Recognition of deferred tax**

The extent to which deferred tax asset to be recognized is based on the assessment of the probability of the future taxable income against which the deferred tax asset can be utilized.

**II. Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

**(i) Useful lives of depreciable assets**

The Company reviews its estimate of the useful lives of depreciable assets at each reporting date, based on the expected utility of the assets.

**(ii) Defined benefit obligation**

The cost of the defined benefit plan and other post-employment benefits and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future trends salary increases, mortality rates and future pension increases. In view of the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Notes forming part of the financial statements as at and for the period ended December 31, 2023

**(iii) Impairment of assets**

In assessing impairment, the Company estimates the recoverable amount of each asset or cash-generating units based on expected future cash flows and uses an interest rate to discount them. Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate.

**(iv) Fair value measurement of financial instruments**

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

**(v) Assessment of potential markdown inventory**

The Company at each reporting date makes an assessment of potential markdown due to aged inventory. In doing so, it estimates the net realisable value of aged inventory based on historic trend of sale of such/ similar aged inventory. Further, it also estimates the provision for shrink based on past trends which it believes is more than or near to actual shrink to be booked as and when stores are counted annually.

**(vi) Incremental borrowing rate for leases**

The Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Company 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates.

**2.4 Recent pronouncements**

The Ministry of Corporate Affairs (MCA) notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 31, 2023, the MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2023, as below :

**Ind AS 1 – Presentation of Financial Statements.** The amendments require companies to disclose their material accounting policies rather than their significant accounting policies. Accounting policy information, together with other information, is material when it can reasonably be expected to influence decisions of primary users of general purpose financial statements. The Company does not expect this amendment to have any significant impact in its financial statements.

**Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors.** The amendments will help entities to distinguish between accounting policies and accounting estimates. The definition of a change in accounting estimates has been replaced with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty". Entities develop accounting estimates if accounting policies require items in financial statements to be measured in a way that involves measurement uncertainty. The Company does not expect this amendment to have any significant impact in its financial statements.

Notes forming part of the financial statements as at and for the period ended December 31, 2023

g) Government grants

Government grants are recognised where there is a reasonable assurance that the grant will be received and all attached conditions will be complied with:

- When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed.
- When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When loans or similar assistance are provided by governments or related institutions, at a below market rate of interest, the effect of this favourable interest is treated as a government grant. The loan or assistance is initially recognised and measured at fair value, and the government grant is measured as the difference between the proceeds received and the initial carrying value of the loan. The loan is subsequently measured as per the accounting policies applicable to financial liabilities.

h) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalised as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur in the Statement of Profit and Loss. During the period the borrowing cost is Nil.

i) Income Taxes

Current tax

The Income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in India.

The management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is recognised on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except when the deferred tax liability arises from the initial recognition of goodwill or an asset or a liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor the taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Tax benefits acquired as a part of business combination, but not satisfying the criteria for separate recognition at that date, are recognised subsequently if new information is received or circumstances change. Acquired deferred tax benefits recognised within the measurement period reduce goodwill related to that acquisition, if they result from new information obtained about facts and circumstances existing at the acquisition date.

Current tax and deferred tax relating to items recognised outside the Statement of Profit and Loss are recognised outside the Statement of Profit and Loss (either in OCI or in equity). Current tax and deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

j) Property, plant and equipment ("PPE")

Property, plant and equipment is stated at cost net of accumulated depreciation and accumulated impairment losses, if any. Cost comprises of cost of acquisition or construction inclusive of duties (net of tax) incidental expenses, interest and erection/commissioning expenses incurred up to the date asset is put to use. Administrative and other general overhead expenses that are specifically attributable to construction or acquisition of PPE or bringing the PPE to working condition are allocated and capitalized as a part of cost of PPE. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives.

Capital work-in-progress is stated at cost net of accumulated impairment losses, if any. Cost includes borrowing costs for long-term construction projects, if the recognition criteria is met.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company, and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is de-recognised when replaced. All other repairs and maintenance are charged to the Statement of Profit and Loss, during the reporting period in which they are incurred.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial period end and adjusted prospectively, if appropriate.

A handwritten signature in blue ink, appearing to be a cursive name.

Notes forming part of the financial statements as at and for the period ended December 31, 2023

**Derecognition**

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e., removed from the Company's balance sheet) when:

- i. The rights to receive cash flows from the assets have expired, or
- ii. The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass through' arrangement; and either a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Company has transferred an asset, the Company evaluates whether it has transferred substantially all the risks and rewards of the ownership of the financial assets. In such cases, the financial asset is derecognised. Where the entity has not transferred substantially all the risks and rewards of the ownership of the financial assets, the financial asset is not derecognised.

Where the Company has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognized to the extent of continuing involvement in the financial asset.

**Financial liabilities**

**Initial recognition and measurement**

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss. All financial liabilities are recognized initially at fair value and, in the case of payables, net of directly attributable transaction costs.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts.

**Subsequent measurement**

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/ losses are not subsequently transferred to P&L. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss. The Company has not designated any financial liability as at fair value through profit and loss.

**Derecognition**

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

**e) Foreign currencies**

**Transactions and balances:**

Transactions in foreign currency are recorded applying the exchange rate at the date of transaction. Monetary assets and liabilities denominated in foreign currency, remaining unsettled at the end of the year, are translated at the closing exchange rates prevailing on the Balance Sheet date. Exchange differences arising on settlement of monetary items are recognised in the Statement of Profit and Loss. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e. translation differences on items whose fair value gain or loss is recognised in Other Comprehensive Income (OCI) or the Statement of Profit and Loss are also reclassified in OCI or the Statement of Profit and Loss, respectively).

**f) Revenue recognition**

Revenue from contracts with customer is recognised upon transfer of control of promised goods/services to customers at an amount that reflects the consideration to which the Company expect to be entitled for those goods/ services.

To recognize revenues, the Company applies the following five-step approach:

- Identify the contract with a customer;
- Identify the performance obligations in the contract;
- Determine the transaction price;
- Allocate the transaction price to the performance obligations in the contract; and
- Recognise revenues when a performance obligation is satisfied.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of goods sold and services rendered is net of variable consideration on account of various discounts and schemes offered by the Company as part of the contract.

Goods and Service Tax (GST) is not received by the Company in its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

A handwritten signature in blue ink, appearing to be "e".

Notes forming part of the financial statements as at and for the period ended December 31, 2023

c) Fair value measurements and hierarchy

The Company measures financial instruments, at fair value at each Balance Sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (a) In the principal market for the asset or liability; or
- (b) In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use, or by selling it to another market participant that would use the asset in its highest and best use. The Company uses valuation techniques that are appropriate in the circumstances, and for which sufficient data are available to measure the fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy based on its nature.

d) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

The Company classifies its financial assets in the following measurement categories:

- Those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss).
- Those measured at amortized cost.

Initial recognition and measurement

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortized cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income (FVTOCI)

Where assets are measured at fair value, gains and losses are either recognized entirely in the statement of profit and loss (i.e. fair value through profit or loss) or recognized in other comprehensive income (i.e., fair value through other comprehensive income)

Debt instruments at amortized cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- i. The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii. Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

Cash flow characteristics test:

The contractual terms of the Debt instrument give rise on specific dates to cash flows that are solely payments of principal and interest on principal amount outstanding. After initial measurement, financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

Debt instrument at FVTOCI

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- i. The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii. The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain or loss in the P&L. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to P&L. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL. In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument as at FVTPL. Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the P&L.

Notes forming part of the financial statements as at and for the period ended December 31, 2023

1 Corporate and General Information

Konnect Style Retail Private Limited (the Company) is a private Company domiciled in India and incorporated under the provisions of the Companies Act, 2013. The Company is engaged in business of retailing a variety of apparels and non-apparels consumer products through ecommerce channel. The Company was incorporate on May 13' 2023.

The Interim financial statements have been approved and adopted by the Board in their meeting held on Jan 08, 2024.

The Company is wholly owned subsidiary of Bazaar Style Retail Limited (CIN No- U18109WB2013PLC194160).

2 Significant accounting policies

2.1 Basis of preparation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, Companies (Indian Accounting Standards) Amendment Rules, 2018, read with Section 133 of the Companies Act, 2013 ("the Act") and presentation requirements of Division II of Schedule III of the Act and other relevant provisions of the Act as applicable.

The financial statements have been prepared on accrual basis under the historical cost convention, except the following assets and liabilities, which have been measured at fair value as required by the relevant IND AS:

- Certain financial assets and liabilities (refer accounting policy regarding financial instruments);
- Defined employee benefit plans;

Rounding off amounts

The financial statements are presented in Indian Rupee ( ₹ ) and all values are rounded to the nearest lakhs, except when otherwise indicated.

2.2 Use of Estimates and Judgements

The preparation of the Company's financial statements in conformity with the recognition and measurement principles of Ind AS requires management to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, income and expenses, the accompanying disclosures and disclosures of contingent liabilities. Estimates and underlying assumptions are reviewed on an ongoing basis. Uncertainty about these estimates and assumptions could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumption in these financial statements have been disclosed below. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Critical accounting estimates and judgments used are as below:

- (i) Defined benefit obligation
- (ii) Recognition of current tax and deferred tax
- (iii) Recognition and measurement of provisions and contingencies
- (iv) Fair value measurement of Financial instruments
- (v) Provision for Doubtful Debts and advances

2.3 Summary of significant accounting policies

A summary of the significant accounting policies applied in the preparation of the financial statements are as given below. These accounting policies have been applied consistently to all the periods presented in the financial statements.

a) Current versus non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current/ non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current

A liability is treated as current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is an unconditional right to defer the settlement of the liability for at least twelve months' after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities respectively.

b) Segment information

Segments are identified based on the manner in which the Chief Operating Decision Maker ('CODM') decides about resource allocation and reviews performance. Segment results that are reported to the CODM include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.
